## How to measure

All measurements are measured directly on the body or with thin clothes on. All measurements are in cm.

1. Bust - measure around the fullest part of your bust.
2. Underbust - the circuit directly under the bust, measured as tight as possible.
3. Waist - measured where the waist is at narrowest, under ribcage.
4. Hip - measured over hipbone.
5. Lower hip - the circuit around the fullest part of your hip area.

## Find your cup size

	A	B	C	D	E	F	G
1. Difference	13	15	17	19	21	23	25
Cup size range	12-14	14-16	16-18	18-20	20-22	22-24	24-26

If you have 78cm as a underbust measurement, you are a size 38 and with a difference of 19cm between measurement 1 & 2, means that you have a D-cup, your size is therefore 38D.

Example: Bust (1) 97cm  
 Underbust (2) - 78cm  
 Difference = 19cm 19cm = D-cup

	34	36	38	40	42	44	46
D	65D	70D	75D	80D	85D	90D	95D
E	65E	70E	75E	80E	85E	90E	95E
F	65F	70F	75F	80F	85F	90F	95F
G	65G	70G	75G	80G	85G	90G	95G

Finding the correct size can be tricky business! Here's an example of how to think when choosing and trying on different cups.

- × If trying on a bra in ex. 38E and you feel the cupsize is good but underbust width is too big you need to try 36F.
- × If trying on 38E and cupsize is good but underbust is too small you need to try 40D.
